Notice

The Georges Bank (GB) haddock incidental catch cap is monitored based on the Northeast multispecies fishing year (May 1-April 30).

If the GB haddock incidental catch cap is caught, any vessel issued a herring permit and using midwater trawl gear may not fish for, possess, or land more than 2,000 lb of herring in the Herring GB Haddock Accountability Measure Area.

The method used to estimate haddock catch by midwater trawl herring vessels is

the same method used to monitor butterfish catch in the Longfin squid fishery.
