

NOAA FISHERIES

NOAA Fisheries Northeast Fisheries Science Center and Regional Office Hosting a Public Meeting on Flatfish Cooperative Research

NOAA Fisheries is aware of concerns about the recent Georges Bank yellowtail flounder assessment. In order to address these concerns and improve our understanding of flatfish abundance on Georges Bank, we will be conducting a pilot flatfish survey in August aboard two commercial fishing vessels. We invite members of the commercial fishing industry and general public to join us to discuss the goals and design of this collaborative project.

WHEN: Wednesday, June 26, 2013

4:00 – 6:00 PM

WHERE: New Bedford Whaling Museum

18 Johnny Cake Hill, New Bedford MA

For more information, contact Olivia Rugo, Regional Office, at 978-675-2167 or email her at Olivia.rugo@noaa.gov
