

**PBR and mean annual bycatch (CV in parentheses) from 2001-2005
for species interacting with trawl fisheries**

Species	Strategic?	PBR	Total Mortalities	NE BOTTOM	NE MIDWATER (herring & mackerel only)	MIDATL BOTTOM	MIDATL MIDWATER (herring & mackerel only)	GOM/GB herring mid-water trawl JV and TALFF
Common dolphin	No	1000	145 (0.11)	28.02 (0.13)	0	117.94 (0.13)	0	0
Pilot whales ¹	No	249	158.28 (0.09)	18.54 (0.12)	1.5 (0.35)	37.74 (0.15)	6.5 (0.35)	11
Whitesided dolphin ²	No	509	357.04 (0.12)	191.87 (0.13)	19 (0.35)	29.17 (0.11)	84 (0.35)	2
Minke whale ³	?	19	2.8+	1+ ⁴	0	0	0	0
Harbor Porpoise ⁵	Yes	610	739+ (0.16)	5+	0	0	0	0

¹ Pilot whales also have 86 (CV=0.16) takes in the pelagic longline fishery (excluding NED-E).

² Whitesided dolphins also have 31 (CV=0.35) takes in the NE sink gillnet fishery.

³ Minke whales also have 2.6 takes from US fisheries (from stranding data) and 0.2 takes from ship strikes (from strandings data).

⁴ There was one freshly dead minke whale caught in 2004 in the NE bottom trawl on the northeast tip of Georges Bank in US waters.

⁵ Harbor porpoise also have 734 (CV=0.16) takes in the Northeast and Mid-Atlantic gillnet fisheries.
