- The first mobile life stage of sturgeon after hatching from an egg
- This occurs when the number of fish taken from an ecosystem and population is greater than the population's ability to replenish the number in the population through reproduction
- Referring to a mouth/jaw which is capable of being extended outward in order to suck up prey items
- Searching for food or prey
- Made from the swim bladder of sturgeon; used as a binding agent for paint, an adhesive, and also a clarifying agent for wine
- Fish that spend some of their life cycle in salt water and migrate to fresh water rivers and streams to spawn
- Whisker-like sensors near the mouth used to find prey
- A fish that feeds on the benthos or bottom of the water column
- Processed roe or eggs of sturgeon
- Near the mouth of a river where the ocean saltwater meets and mixes with the freshwater of the river
- A sac attached to the embryo that provides nourishment
- An animal that has not matured to an age where it can reproduce, but exhibits ALL external traits of the adult

Now take the letters in the circles and unscramble them below to find out the bonus word.... -----
