

# Butterfish Mortality Cap for the Directed Longfin Squid Fishery

Report run on: May 26, 2016  
 For data reported through: May 25, 2016  
**Quota period:** Trimester 2  
**Quota period dates:** 05/01/2016 to 08/31/2016

| Reporting Period | Estimated butterfish discard (mt) | Cumulative estimated butterfish discard (mt) | Cumulative percent of quota (660 mt) |
|------------------|-----------------------------------|--|--------------------------------------|
| Trimester 1      | 1,063.6                           | 1,063.6                                      | 63.7                                 |
| Trimester 2      | 51.3                              | 51.3   | 5.2                                  |
| Trimester 3      |                                   |  |                                      |
|                  |                                   |  |                                      |

**Notice**

The 2016 specification for longfin squid will be effective May 25, 2016.

In Trimester II, the directed longfin squid fishery is closed if:

Longfin squid landings are projected to reach 5,152 mt (11,358,216 lb) (from May 1 to August 15)

-OR-

Longfin squid landings are projected to reach 5,438 mt (11,988,738 lb) (from August 15 to August 30)

-OR-

The butterfish discard cap reaches 918 mt (2,023,844 lb) (from May 1 to August 31).

The Trimester II closure threshold will change on August 15 of each year from 90 to 95% to avoid 1-2 week closures at the end of the Trimester.
