\* The sub-ACL, if exceeded, may result in accountability measures in the following fishing year

\*\* The sub-ACT is the actual amount used to set limited access vessel allocations. It is used as a management uncertainty buffer to minimize chances that the limited access fleet will exceed the sub-ACL.

These data are the best available to NOAA's National Marine Fisheries Service (NMFS) when this report was compiled. Data for this report are supplied to NMFS from vessels via Vessel Trip Reporting and the Vessel Monitoring System, and dealers via Dealer Electronic Reporting. Data may be preliminary.
