Landings statistics for species without target TACs including scallops, silver hake, and red hake are available in the attachment.

*TAC includes commercial landings, and discards, recreational landings, or Canadian landings. Only commercial landings are available for monitoring.

**TAC only includes lengths greater than 60 cm. Landings data include all lengths.

Monkfish quotas were revised on October 22, 2007 and the new quota figures are presented above.

The preliminary fisheries statistics indicating stock areas and gears in this report were derived by prorating available dealer electronic and vessel log data. These preliminary statistics, therefore, represent the currently available information, but are subject to revisions in the future.

Note: 1) Data of selected species are reported in detail (see table of contents).
2) This report will become available on the NMFS website:

1. The three digit statistical areas defined below are for statistical and management purposes and may not be consistent with stock area delineation used for biological assessment (see the attached statistical chart).

Cod stock areas: Gulf of Maine: 464-465, 467, 511-515
 Georges Bank: 521-637

2. Landings in live weight.

3. Gear data are based on vessel trip reports.

* Fishing Year is May 1 through April 30.

** TAC includes commercial landings and discards, and recreational landings.

+ US portion of the Georges Bank target TAC. Total GB TAC for FY07 is 9,822 metric tons (21,653 thousand lbs.)
