

Scup Coastwide Quota Monitoring

Regulations (<https://www.greateratlantic.fisheries.noaa.gov/sustainable/species/scup/index.html>)

Report Run on: 2019-12-30

For data reported through 2019-12-29

Quota Period: 2019, Winter II

Quota period dates: October 1, 2019 to December 31, 2019

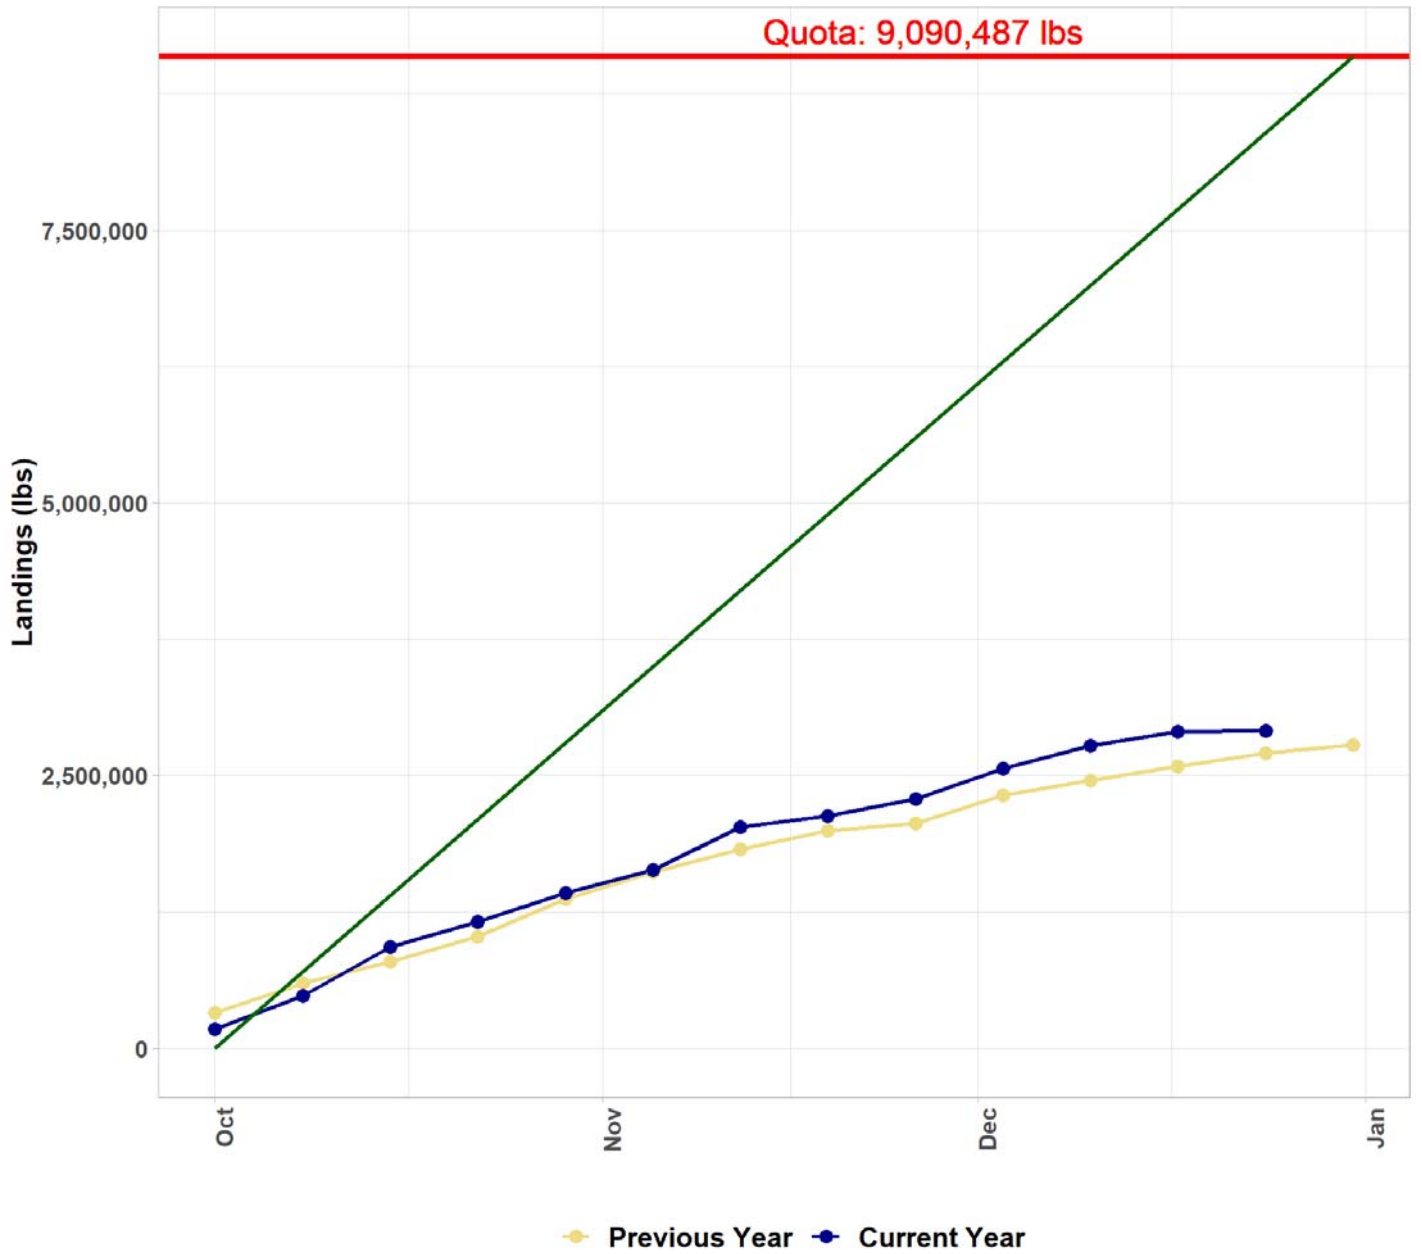

Previously Reported Landings (Pounds)	Previous Weeks Updates (Pounds)	Current Weeks Landings (Pounds)	Cumulative Landings (Pounds)	Quota (Pounds)	Percent of Quota (%)	Annual Research Set-Aside Landings (Pounds)
2,900,577	126,173	7,730	2,908,307	9,090,487	31.99	0

Notice

The 2018 and projected 2019 Scup Specifications have established the 2019 commercial scup quota upon their publication on December 17, 2018, 83 FR 64482.

Unused quota from the Winter I period will be transferred to Winter II.

Negative landings can be the result of updates to the database (e.g. reported Research Set-Aside landings are subtracted from the Commercial Current Week's Landings or Previous Weeks' Updates). As a result, the Commercial Current Week's Landings or Previous Weeks' Updates can be negative.

These data are the best available to NOAA Fisheries Service when this report was compiled. Data are supplied to NOAA Fisheries Service by dealers via Dealer Electronic Reporting to the Atlantic Coastal Cooperative Statistics Program (ACCSP) and/or by state agencies and may be preliminary. Discrepancies with data from previous Weekly Landings Reports are due to corrections made to the database.
